Notes:

- (1) MSS represents the Mean Scale Score and is obtained by adding the Scale Scores of all students in a group then dividing by the number of students in that group. Source: Council for American Private Education (CapeNet) <http://www.capenet.org/brs.html>
- (2) NP of MNCE represents the National Percentile of the Mean Normal Curve Equivalent. This is the percent that exceed the MNCE, or the percent of students in the 85th percentile or greater. Source: CAPE website
- (3) In grades where the number of students with an IEP (Individualized Education Plan, or students receiving services) exceeds 10 the data is weighted to aggregate IEP scores and non-IEP scores.
- (4) In 2010, CAPE changed its overall qualifying standard from the 90th to the 85th percentile for schools using Terra Nova, Third Edition. **At every grade level SMS exceeds CAPE requirements. In fact, SMS scores meet or exceed the requirements even at the 90th percentile.**

Statement: "The results from the 2017 Terra Nova test, a nationally recognized standardized test, place St. Mat in the top 15 percent of schools in the nation in reading and mathematics as referenced against national norms."
